Performance
and protection

*Protection of products and excellent aesthetic effect.
The micaceous iron products of the new LASURCAP
line give value to the treated surfaces by adding
a highly decorative protective action. They give
outstanding coverage, especially on the edges, and
effective resistance to sunlight. In addition to this,
their composition based on micaceous oxide prevents
the penetration of water, oxygen and chemical agents
present in the atmosphere. These products are specific
for the direct application on zinc.*

Unifercap

Micaceous enamel

Enamel suitable for paint systems of different artefacts, waterproof, easy to apply, ideal for professional use as it has high compatibility and adhesion. Good filling capacity and coverage of different types of surfaces. Ensures a finish characterized by high uniformity and by strong resistance both mechanical and weathering, necessary elements for the duration of the applications, useful for protecting the artefact over time.

Its high quality achieves the aesthetic and technical solution for the various painting requirements with a high level of finish and with maximum protection and colour resistance outdoors, even in situations of high exposure to harsh conditions.

- RESISTANT TO ATMOSPHERIC AGENTS
- RESISTANT TO IMPACT
- ANTICORROSION
- ADHESION TO DIFFERENT KINDS OF SURFACES
- COVERAGE ON CORNERS

Colour: as by samples.
The colours are feasible with the Arreghini Colors 16 system. Between one production and the other the colour may be slightly different, it is therefore necessary to finish the job with the same production.

Unifercap Medio

Micaceous enamel

Enamel suitable for painting different types of artefacts, waterproof, easy to apply, ideal for professional use as it has high compatibility and adhesion, filling capacity and coverage of different types of surfaces. Ensures a finish characterized by high uniformity and by excellent resistance both mechanical and weathering, necessary elements for the duration of applications, useful for protecting the artefact over time.

Its high quality achieves the aesthetic and technical solution for the various painting requirements with a high level of finish and with maximum protection and colour resistance even in situations of high exposure to harsh conditions.

This glaze is characterized not only by its protective action, but also by a highly decorative function, with an antique rustic aesthetic matt effect of which can be obtained. Unifercap Medio gives value to the items treated.
