Silomur W

Waterborne siloxane water repellent

Transparent solvent-free protective product for interiors and exteriors, based on siloxane resins that make the treated surfaces water-repellent. Silomur W is non film-forming, so it protects walls from moisture, leaving them to breathe without altering the appearance and colour underneath. Its water-repellent effect helps to keep the treated surface clean for a long time.

The technical information stated is approximate. It is advisable to follow the specific conditions of use. For more detailed information see the data sheet downloadable from our website www.caparreghini.it
