

**DESCRIPTION**

An additive in aqueous dispersion of a fungicide that is effective against various species of mould and insoluble in water, a characteristic that contributes to the long-term preservation of the paint film.  
It is suitable for interior, breathable and washable paints.

**PROPERTY OF  
THE PRODUCT  
SPECIFIC**

	<b>Value</b>	<b>Method</b>
<b>Solid by weight</b>	2.5 – 3.5 %	Internal PF25
<b>Specific weight</b>	1000–1050 g/l	Internal PF3

**SHELF LIFE**

1 year minimum, stored in its unopened original can at temperatures between +5°C and +30°C.

**TYPICAL USE**

A10 is used introduced into water-based paints (2 litres for every 14 litres of paint).  
Shake well before use.

**SPECIFICATION  
ITEM**

Aqueous dispersion of a fungicide that is effective against various mould species and insoluble in water, suitable for interior paints.

**INSTRUCTIONS**

To carry out the work in a proper way, it is needed to strictly follow the instructions for the preparation of the surfaces contained in the CAP Arreghini Books. This technical information is intended as a rough guide. However, because of the enormous variety of media and application conditions, it is essential to check the suitability of the product and test the effectiveness on a sample. The specification data and technical information have been calculated at +23°C with relative ambient humidity of 65%. In different conditions the data and the time intervals between the two phases of the above reported coating system can vary.
