

Chromocap

Anti-corrosion primer with zinc phosphates

Solvent-based primer suitable for preventing rust formation on ferrous metal substrates, ideal for coating systems on ferrous manufactured items located outdoors or indoors. Featuring excellent adhesion, flow and filling power, it provides a solid anchor for topcoats and enhances their covering ability.

Designed for the protection of iron structures and objects placed outdoors or indoors such as railings, frames, grilles, tanks and agricultural equipment.

Linea **LASURCAP**

HIGH CORROSION RESISTANCE
HIGH ADHESION ON FERROUS METAL
SUBSTRATES
FAST DRYING

HIGH AESTHETIC UNIFORMITY

Chromocap

Anti-corrosion primer with zinc phosphates

COMPOSITION

Product formulated with solvent-based alkyd resins, passivating pigments, and ion-exchange pigments

good water impermeability and an antioxidant effect. It features fast drying, allowing quick painting operations

Thanks to its composition and versatility, it can be overcoated with fast-drying enamels and alkyd enamels.

CHARACTERISTICS

Once applied, it creates an elastic film resistant to dimensional variations of the substrate, forming a barrier with

FIELD OF APPLICATION

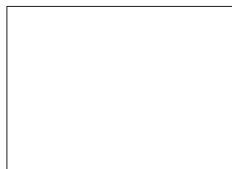

Suitable for the protection both domestic and professional of new or maintenance-phase iron substrates exposed to highly corrosive agents.

TECHNICAL CHARACTERISTICS OF THE PRODUCT

APPLICATION	Brush, spray, roller
SUBSTRATE	new or rusty iron (properly prepared)
COVERAGE	13-15 m ² /L for 35 µm dry
DRYING	recoatable after 12 h, fully cured after 5 days
DILUTION	roller, brush: 5% by volume with Thinner S800 spray: 5% by volume with Nitro NV 5000
APPLICATION CONDITIONS	application temperature +5°C +30°C
