

Classic W

Water-based protective woodstain

Water-based wood impregnating agent, available in clear or transparent tinted versions. It offers excellent penetration, easy application, and a finish that enhances the natural grain of the wood. The product ensures an odourless application and a low environmental impact, preserving user comfort and safety.

Designed for the protection of wooden structures and items used both outdoors and indoors, such as roof beams, fences, gazebos, windows, doors, cornices, urban furniture, garden furniture, beams, and matchboarding.

ARREGHINI®
ITALIAN PAINTS SINCE 1950

Classic W

Water-based protective woodstain

COMPOSITION

Water-based product formulated with synthetic resins and transparent iron oxides.

FIELD OF APPLICATION

Suitable for both domestic and professional use as a first coat on raw

wood surfaces of various species, for items intended for exterior or interior use. It features excellent flow and levelling properties, allowing easy application by brush, flow-coating, impregnation systems, or dipping. For maximum outdoor protection under conditions of strong exposure to weathering and sunlight,

the product should be applied as a first coat and overcoated with an acrylic finish in a coloured semi-transparent coating system. Its odourless formulation makes it particularly suitable for use in poorly ventilated environments.

TECHNICAL CHARACTERISTICS OF THE PRODUCT

APPLICATION	Brush, spray, dipping, impregnation system, flow-coating
SUBSTRATE	Raw or pre-treated substrate, properly sanded
COVERAGE	11–13 m ² /L per coat
DRYING TIME	Touch dry: 4–6 h – Fully dry: 24 h
DILUTION	Ready to use
APPLICATION CONDITIONS	Application temperature: +10°C to +30°C – Relative humidity: < 65%

For more information on the product and the application cycle, refer to the technical data sheet available for download at www.caparreghini.it
