

Powercap

Water-based acrylic-polyurethane enamel for metal, wood and plastic

Water-based enamel with excellent protective performance, available in gloss, satin, and matte finishes. Suitable for long-lasting coating systems on metal, wood, and plastic structures used outdoors or indoors, it provides outstanding resistance to abrasion and dirt penetration. Its high quality allows direct adhesion to galvanized steel, aluminum, and light alloys. Complies with the requirements of Regulation 852/2004/EC for use in environments where high hygiene and cleanliness standards must be maintained, including areas for handling or storing food products.

Intended for the protection of structures both outdoors and indoors, such as tables, railings, doors, fences, attics, planters, gazebos, beams, and radiators.

Powercap

Water-based acrylic-polyurethane enamel for metal, wood and plastic

COMPOSITION

Product formulated with acrylic-polyurethane resins in aqueous emulsion and light-stable selected pigments.

CHARACTERISTICS

Powercap is made with low environmental impact raw materials, ensuring minimal VOC emissions to preserve user well-being and safety while protecting the environment.

FIELD OF APPLICATION

Suitable for protecting new or maintenance-phase items placed outdoors or indoors, providing maximum UV resistance and protection against weathering. Its composition allows treated surfaces to resist abrasion and cleaning with common detergents and antibacterial disinfectants. Excellent coverage and smooth application, both by brush and roller, make it extremely

easy to apply. Being odourless, it is particularly suitable for use in poorly ventilated indoor environments.

AESTHETIC EFFECT

Thanks to its formulation, it ensures a uniform and long-lasting aesthetic appearance, with a non-yellowing finish and high whiteness.

TECHNICAL CHARACTERISTICS OF THE PRODUCT

APPLICATION	Roller, brush, spray
SUBSTRATE	Metal, wood, plastic, galvanized steel, aluminum
COVERAGE	9-11 m ² /L per coat
GLOSS	Gloss: ≥ 70 and ≤ 75 – Satin: ≥ 30 and ≤ 40 – Matte: ≥ 10 and ≤ 15
DRYING	Re-coatable: 3 h – Fully dry: 10 days
DILUTION	Ready to use
APPLICATION CONDITIONS	Application temperature: +15°C to +30°C

For more information on the product and the application process, please refer to the technical data sheet available for download at www.caparreghini.it

COLOURS AVAILABLE IN STOCK
