

Antiruggine

Synthetic antirust

Solvent-based primer suitable for preventing corrosion on ferrous metal substrates, both indoors and outdoors. It is ideal for coating systems on new or maintenance-phase metal items exposed to highly corrosive agents. Featuring excellent adhesion, flow, and filling power, it provides a strong anchorage for topcoats and enhances their hiding power.

Intended for the protection of structures and objects placed indoors and outdoors, such as railings, metal window frames, grilles, and gates.

Linea **LASURCAP**

HIGH CORROSION RESISTANCE
EXCELLENT ADHESION ON FERROUS
METAL SUBSTRATES
FAST DRYING

HIGH AESTHETIC UNIFORMITY
UNIFORM FILM THICKNESS

EASY TO APPLY
FILLING POWER AND COVERAGE
THINNABLE WITH MINERAL SPIRIT

Antiruggine

Synthetic antirust

COMPOSITION

Formulated with modified alkyd resins in solvent phase and selected anticorrosive pigments.

provides good water resistance and strong anti-rust protection. It features fast drying, allowing for quick execution of the coating process.

new, rusted, or previously painted iron items exposed to highly corrosive agents. As a primer, it must always be covered with a synthetic finishing system.

CHARACTERISTICS

Its composition ensures excellent adhesion to metal, creating a barrier effect that

APPLICATION FIELD

Suitable for the protection, in both domestic and professional settings, of

TECHNICAL CHARACTERISTICS OF THE PRODUCT

APPLICATION	Brush, spray
SUBSTRATE	New or rusty iron (properly prepared)
YIELD	11-13 m ² /l per coat
DRYING TIME	Recoatable with itself after 1 h, recoatable with topcoat after 12 h, fully dry
DILUTION	after 5 days 0-15% by volume with White Spirit VD100
APPLICATION CONDITIONS	Temperature +5°C +30°C

For more information on the product and the application cycle, refer to the technical data sheet available for download at www.caparreghini.it
