

Classic W R11 (W2368CC000)

Anti-mould and anti-woodworm wood preservative

Water-based anti-mould and anti-woodworm wood preservative for application on timber installed above ground and not in contact with water, providing preventive protection against insects, termites, blue stain fungi, and brown rot. Designed for preventive treatment, it is suitable for Use Classes 2 and 3 (UNI EN 335). It can be applied manually or by industrial methods, both indoors and outdoors.

Intended for the protection of exterior wooden structures and elements such as windows, window frames, doors, cornices, fences, beams, and cladding boards.
