# CAP Arreghini SpA

CAP Arreghini was developed out of a passion for color when, in 1950, Adolfo Arreghini, artist and expert restorer, began to produce the colors that he needed for his profession. This small establishment gave birth to CAP - Colorificio Arreghini Portogruaro which, over the years, grew and evolved, adapting itself to the needs of the sector, becoming an SpA (joint stock company) in 1988. Its ability to satisfy and anticipate market needs has allowed CAP Arreghini to offer a wide range of products for walls, wood and iron, for various building applications, making it one of the main players in the national market. Today, CAP Arreghini also has many exclusive distributors throughout Europe.

## Mission

Planning, creating and distributing paints and varnishes for building construction, wood and iron buildings that guarantee an aesthetic effect, attention to human welfare and respect for nature.

## Culture of quality

CAP Arreghini has a strong quality culture that can be seen in all aspects of its business practices through a constant process of updating and innovation aimed at continuously improving performance. From the careful selection of suppliers and materials up to the finished product and its distribution, all phases are constantly monitored according to a rigid auditing system that guarantees perfect balance between respect for the regulations and requested performance, paying maximum attention to human well-being.

## Certificazioni

CAP Arreghini SpA has a UNI EN ISO 9001 quality certification as well as numerous product certifications that guarantee compliance with the levels required by the various national and international regulations.

Since 2020, the company has had an environmental management system, certified UNI EN ISO 14001, to confirm its commitment to the continuous improvement of its performance and its attention to sustainability policies, as part of a process of constant updating aimed at improving all the company's processes in order to effectively meet the expectations of customers and other interested parties.

## GRASSELLO

*Slaked lime decoration*

Mineral coating based on aerial lime, easy to apply, with quick drying times. It is characterized by a high diffusion of water vapor to ensure dry walls and avoid condensation in environments such as kitchens and bathrooms. It is easily polishable and generates a compact finish. Colours as per specific colour chart. This product can be tinted with the AC16 tinting system.

Indications for use

## MARMORINO VENEZIANO

*Lime-based coating*

Easily applicable mineral coating for interiors and exteriors based on aerial lime and micronized marble powder. Given its chemical nature, it hardens by means of a chemical reaction with the substrate without forming a film. Its high alkalinity makes it more resistant to mould compared to common interior paints.

Indications for use

## MARMORINO

*Lime-based decorative coating with marmorino effect*

Mineral coating for interiors and exteriors based on aerial lime, easily applicable. Given its high alkalinity, it has greater resistance to moulds than common interior paints and is suitable for finishing dehumidifying systems. The high filling capacity allows to achieve a compact and antiquing finish, characterized by different shades and chromatic effects. Colours as per specific colour chart. This product can be tinted with the AC16 tinting system.

## TRAVERTINO

*Textured lime based decoration with travertine effect*

Travertino is a wall covering in paste for exteriors and interiors, based on a mineral binder, which allows to obtain a finish very similar to that of the ancient plaster found in buildings in Venice. It combines low water impermeability with excellent water vapor diffusion. Colours as per specific folder. This product can be tinted with the AC16 tinting system.

## TRAVERTINO DRY

*Textured lime based powder decoration*

Travertino Dry is a wall coating in powder form for exteriors and interiors, based on a mineral binder, which allows to obtain a finish very similar to that of the ancient plasters found in buildings in Venice. The product in use is always different, characterized by shades and chromatic effects that depend on the skill and characteristics of the decorator.

Indications for use

## CONCRETE CAP

*Concrete effect decorative finish*

Is an acrylic-siloxane decorative coating with algae and mould-resistant properties, designed to achieve a textured "bare" concrete effect with a strong character that gives the idea of solidity and safety. Its composition ensures a high level of surface hardness, good breathability, repellency to rainwater and excellent resistance to mould.

Indications for use

## LINEA MINERALCAP LIME BASED PRODUCTS

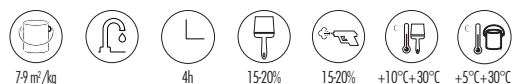

### CALCE

#### Mineral paint for interiors

Mineral paint based on aerial lime, easily applicable, with good coverage. It is characterized by a high diffusion of water vapor and high breathability, such as to make it suitable for finishing dehumidifying systems. The final effect ensures filling capacity, aesthetic homogeneity and uniform opacity even on large surfaces in backlight. This product can be tinted with the AC16 tinting system.

Indications for use

Reference colour charts

COLOUR	PACKAGING	WRAPPING	€ PER LITRE/Kg	€ PER PACKAGE	CODE
Bianco AC 16	Kg 20	1	€ 4,50	€ 90,00	Y17CAB16020

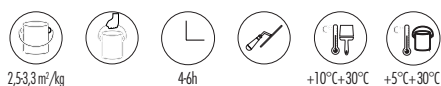

### GRASSELLO

#### Slaked lime decoration

Mineral coating based on aerial lime, easy to apply, with quick drying times. It is characterized by a high diffusion of water vapor to ensure dry walls and avoid condensation in environments such as kitchens and bathrooms. It is easily polishable and generates a compact finish. Colours as per specific colour chart. This product can be tinted with the AC16 tinting system.

Indications for use

### MARMORINO VENEZIANO

#### Lime-based coating

Easily applicable mineral coating for interiors and exteriors based on aerial lime and micronized marble powder. Given its chemical nature, it hardens by means of a chemical reaction with the substrate without forming a film. Its high alkalinity makes it more resistant to mould compared to common interior paints.

Indications for use

# LINEA MINERALCAP LIME BASED PRODUCTS

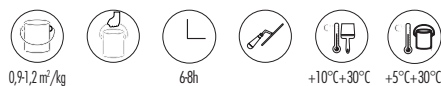

## MARMORINO

*Lime-based decorative coating with marmorino effect*

Mineral coating for interiors and exteriors based on aerial lime, easily applicable. Given its high alkalinity, it has greater resistance to moulds than common interior paints and is suitable for finishing dehumidifying systems. The high filling capacity allows to achieve a compact and antiquing finish, characterized by different shades and chromatic effects. Colours as per specific colour chart. This product can be tinted with the AC16 tinting system.

## TRAVERTINO

*Textured lime based decoration with travertine effect*

Travertino is a wall covering in paste for exteriors and interiors, based on a mineral binder, which allows to obtain a finish very similar to that of the ancient plaster found in buildings in Venice. It combines low water impermeability with excellent water vapor diffusion. Colours as per specific folder. This product can be tinted with the AC16 tinting system.

# LINEA MINERALCAP SILICATE BASED PRODUCT

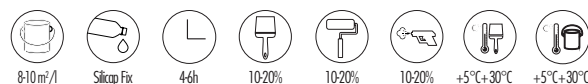

## SILICAP

*Silicate mineral paint for exterior*

Water-based paint with mineral binders based on potassium silicate with a very opaque finish and high breathability, ideal for applications in private or public environments of historical and artistic interest. Due to its chemical nature it does not form a film, but hardens by chemical reaction with the support. This product can be tinted with the AC16 tinting system.

Indications for use

# LINEA CAPNANOTECH PHOTOCATALYTIC AND INSULATION

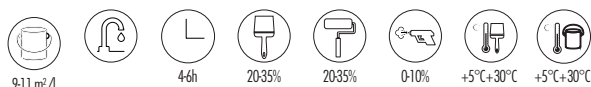

## BIOCLEAN ACTIVE

*Anti-mould, self-cleaning, sanitizing, photocatalytic water-based paint for interiors*

Photocatalytic paint for interior, which allows to eliminate unpleasant odors and any bacteria or mould present on the surfaces, making the air of the rooms cleaner and healthier. Thanks to the photocatalysis process, in fact, the nanoparticles are activated under the action of light destroying the polluting organic substances. Because of its purifying action, it is ideal for treating all high-traffic areas where hygiene is a priority and good air quality is required, such as hospitals, offices, schools, restaurants.

Indications for use

COLOUR	PACKAGING	WRAPPING	€ PER LITRE/Kg	€ PER PACKAGE	CODE
Bianco	L 14	1	€ 10,54	€ 147,56	YBALALWA100014

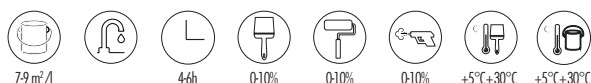

## GRADIENTE ACTIVE

*Anti-mould anticondensation insulating water-based paint for interior*

Anti-condensation paint, formulated with special hollow microspheres that give a low thermal transmission coefficient so as to ensure a minimum temperature difference between the painted surface and the air. This prevents condensation and guarantees a reduction in humidity on the walls treated with less heat loss and greater resistance against bacterial attacks. It is therefore suitable for rooms with a high presence of steam such as bathrooms, kitchens, laundries, where the formation of surface condensation and mould is easier.

## CAPCLEAN ACTIVE

*Photocatalytic water-based self-cleaning anti-mould anti-algae paint for exterior*

Siloxane photocatalytic paint for exterior, impermeable to water, which prevents deterioration of the facades because it favors the removal of polluting agents in the atmosphere. Titanium dioxide particles, in the presence of light and oxygen, are activated by decomposing bacteria, micro-organisms and atmospheric pollutants, ensuring a self-cleaning and anti-pollution action, thus preventing the formation of mould and algae. This product can be tinted with the AC16 tinting system.

Bianco AC 16	L 14	1	€ 13,32	€ 186,48	YCALSLWA101014

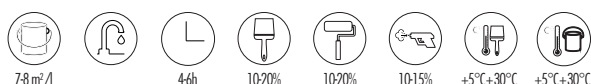

## CAPTHERM ACTIVE

*Anti-mould anti-algae insulating water-based paint for exterior*

Thermal insulating paint for exterior that improves the heat distribution on the surface, ensuring an optimization of the heat exchange that from laboratory test results equal to 5 ° C. Developed for summer and winter insulation, it allows to enhance the thermal performance of the coating and thus save energy. It is also added with active ingredients effective against bacterial attack of fungi and algae. Due to its excellent resistance to thermal stress, it is ideal for painting in the maintenance phase of external insulation systems, in colours with light reflection index LRV >25. This product can be tinted with the AC16 tinting system.

### Fibre-reinforced dehumidifying mortar

Fibre-reinforced dehumidifying mortar based on NHL 3.5 natural hydraulic lime, applied by hand to make base-coat plaster. Suitable for making base-coat plaster on indoor and outdoor walls where there is rising damp, suitable for bio-construction, does not contain added cement. Can be applied to all normal substrates, such as clay bricks, concrete blocks, concrete with a rough surface, clay boards or similar. To be applied in thicknesses between >2 cm and <3 cm per layer. Grit 1.6 mm. Colour Grey.

Indications for use

+5°C+30°C    +5°C+30°C

### PRIMER CAP UNIVERSALE

Water-based covering base for all surfaces

Indoor and outdoor primer formulated with synthetic resins dispersed in water. It has excellent anticorrosive and adhesion properties on different types of supports such as iron, cast iron, galvanized sheet metal, wood, rigid PVC, aluminum, suitably prepared masonry works. White colour.

Indications for use

Symbols

COLOUR	PACKAGING	WRAPPING	€ PER LITRE/Kg	€ PER PACKAGE	CODE

	L 2,5	2	€ 22,61	€ 56,53	YPRUNWBA1002V5

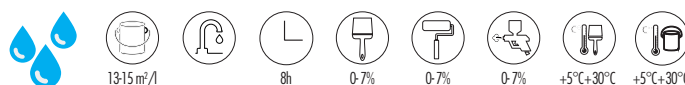

### CHROMOCAP W

Water-based primer with high anti-rust power

Antirust suitable to prevent corrosion of iron supports and, due to its excellent adhesion, it is also suitable as a primer on galvanized steel, aluminum and light alloys. Characterized by excellent substrate wetting, hardness and flexibility, it resists unaltered the natural stresses due to the dimensional variation of the support due to changing weather conditions. Colour: Grey RAL 7035.

Indications for use

# LINEA NOVOLEGNO **WOODSTAINS**

## CLASSIC

*Solvent-based protective woodstain*

Solvent-based product for surface impregnation, for indoor and outdoor use, highly penetrating, UV resistant with a finish that highlights the wood grain. It is available in semi-transparent colors obtained with micronized mineral pigments with high resistance to light, which give color stability and protection against deterioration caused by UV rays and atmospheric agents. It is easily applicable with manual or mechanical tools and its high quality ensures a good pore wetting of the wood and a homogeneous and uniform colour distribution. It is formulated to ensure maximum resistance to the product. Colours as per specific colour chart.

## TINTING MACHINES

### ARREGHINI COLORS 16 101

*Electronic 16 canisters*

*Electronic volumetric dosing machine with 16 canisters: 10 canisters of 3 litres and 6 of 6 litres. The product is characterized by a strong reduction of the workload of the operator during brushing of the valves, by the stainless steel in the work areas and easy access to vital parts. The new design, thanks to a low front edge, facilitates the filling operation and can be adjusted to any height desired for optimum ergonomics. It features the new Twin Ball Valve ® pump which has a high precision and is made of 2/5 fl. oz stainless steel.*

**PACKAGING**

CLEOLUX16C

### EUREKA - Arreghini Colors 16 105

*Automatic 16-positions*

*Simultaneous volumetric dosing machine 16 canisters: 4 canisters of 5 litres and 12 canisters of 3 litres. Studied for the need of medium-large sale points, for medium-large volumes of paint in pots of any size. It uses an innovative and patented technology of a progressive cavity pump (PCP). The machine offers maximum precision, high reliability, simultaneity of the delivery of the product and a rapid reproduction of the shade (up to 0.6 l / min with high flow pumps).*

**PACKAGING**

CEUREKA000

### Arreghini Colors 16 103

*Volumetric sequential dosing machine 16 canisters: n.16 2-liter canisters.*

*Automatic Tintometric machine covered by an international patent, studied to satisfy the needs of small shops selling paints for buildings, hardware stores or to paint using small volumes of paint in pots of all sizes.*

**PACKAGING**

CARCHIMEDE

### DATACOLOR®200R SPECTROPHOTOMETER

*Thanks to its extremely reduced opening, Datacolor 110™ is able to measure even very small samples. The new and robust opening with a double alignment allows you to place samples very rapidly. Thanks to the conformation of the sphere, the instrument prevents the presence of shadows on the surface of the sample. Spectrophotometer may be connected with all the CAP Arreghini Tintometric machines.*

**PACKAGING**

CPAINTMAKE

# GENERAL CONDITIONS OF SALE

**PREMISE**

The information contained in the catalogues and other informative material is indicative and may be changed by the company at any time. By placing an order, the Customer fully accepts the following sales and delivery conditions.

**PRODUCT CHARACTERISTICS**

Any information or data on the characteristics and/or technical specifications of the products contained in brochures, price lists, catalogues or similar documents shall be binding only to the extent that such data are expressly referred to in the sales specifications agreed with the customer.

**ORDERS**

All orders shall be deemed to be taken subject to our final approval.

**PRICES**

Prices refer to the price list in force at the time of the order and do not include VAT. These prices are subject to change at any time, even without notice.

**PAYMENTS**

Payments must be made within the established contractual terms, without discounts, deductions or allowances. Only payments made directly at our Company's premises or to a person with written authorisation to collect shall be considered valid. Payments by R.I.BA shall be charged with a collection fee of €2.60, as well as stamp duty, if due. In the event of late payment, interest on arrears will be charged at the current ECB reference rate plus seven points, starting from the day after the agreed payment date, as determined by Article 4 of Legislative Decree no. 231/2002. In the event of default, in addition to the interest on arrears, a reimbursement of expenses of €30.00 shall be charged, as well as all bank charges incurred.

**CONDITIONS OF RETURN**

The goods travel at the risk and peril of the Customer even if sold "free at destination".

The goods must be taken over by the Customer and must not under any circumstances be left lying around at the carrier's premises or at any other storage or disposal point. Any costs for storage, warehousing, etc. shall be borne by the Customer.

The condition of the packages and their number must be checked upon delivery. In view of the fact that the goods are delivered on pallets, an equal number of those delivered must be returned to the carrier. The customer shall return the pallets upon delivery. If the customer does not return the pallets at the time of delivery, or if the customer returns pallets other than the EUR EPAL standard, an amount of €10.00 + VAT per pallet will be charged to the customer by invoice.

For shipments of less than 500 kg, CO.SPE.DI. will be charged €0.09, for shipments of 500 kg or more, CO.SPE.DI. will be charged €0.03.

**CONDITIONS FOR ADHESIVE/SHRINKING TRANSPORTS**

- Any additional cost due to delivery in uncomfortable areas or to complications created by misinformation (e.g. wrong unloading times, impossibility of access to vehicles on the resale, wrong unloading methods) will be charged to CO.SPE.DI.

(e.g. wrong unloading times, lack of access to vehicles, wrong unloading methods, etc.) will be charged in the invoice.

- Cost of storage: 30.00 per pallet - Redelivery: additional amount equal to 65% of the agreed rate - Inconvenient localities, historical centres and minor islands: additional amount equal to 0.065 per kg - Stopover: 35/hour

**ADDITIONAL TRANSPORT CONDITIONS**

For orders of less than 650.00 the recipient will be asked to pay a transport contribution of 25.00, for orders above this amount transport is free.

Delivery times: NORTH/CENTRAL ITALY 48/72 h - SOUTH ITALY 72/96 h - ISLANDS 96/120 h

- Taxable order: additional 3% contribution on purchase order

- Delivery with hydraulic tailboard: 30 per delivery

**PACKAGING**

Together with the products, their containers/packages and packaging are also definitively transferred. The withdrawal and/or disposal of empty or semi-finished containers are, in every phase, the responsibility of the user of the product. (Legislative Decree no. 22/1997).

**COMPLAINTS/RETURNS**

The customer must check the goods on arrival. Any shortages, failures, anomalies or defects of the packages must be immediately notified to the carrier, in writing on the delivery note and countersigned by the carrier. Complaints about defective goods or goods that do not meet the required quality must be notified to the company in writing within eight days of discovering the defect and in any case no later than 3 months from the date of delivery of the products claimed. We do not accept returns of goods without our prior written authorisation.

**WARRANTIES FOR DEFECTS**

In case of defects and/or non-conformity of the products, detected within 6 months from delivery and communicated in writing within 7 days from their detection, the responsibility of the seller shall be limited to the withdrawal of the defective goods or, if necessary, to their replacement: any other compensation for damages is consequently excluded. The vendor guarantees that its products correspond only to the characteristics and specifications expressly agreed upon and described in the contract or in the documents attached to the TD. No liability of any kind is assumed for damage resulting from the use of our products, since the conditions of use are not under our direct control. Our customers are obliged to check, on a case by case basis, whether our products are suitable for their application cycles and systems. We are, however, prepared to issue written guarantees, limited to the constancy of our products with respect to the quality initially ascertained, provided that two sealed samples are taken for each order, one of which remains with us and the other with the customer.

**PROHIBITION OF ACTION**

The customer may not take legal action against CAP Atreghini S.p.A. if he has not first fully complied with the agreed payments.

**COMPETENT COURT**

The Court of Venice shall have exclusive jurisdiction over any dispute arising from or in connection with this contract.
